The Alaska Earthquake Information Center located a minor earthquake that occurred on Sunday, February 13th at 4:58 PM AKST in the central region of Alaska. This earthquake had a preliminary magnitude of 3.4 and was located at a depth of about 0 miles (0 km). The magnitude and location may change slightly as additional data are received and processed. This event was felt in Healy. No reports of damage have been received at this time.

Distance to nearby locations:
- 15 km (9 miles) NNW of Denali Park
- 19 km (12 miles) S of Healy
- 33 km (20 miles) N of Cantwell
- 73 km (46 miles) S of Clear
- 98 km (61 miles) S of Nenana
- 100 km (62 miles) E of Kantishna
- 131 km (82 miles) SW of Salcha
- 137 km (86 miles) SSW of Ester

Preliminary earthquake parameters:
- Origin Time (UT): 02/14/2000 01:58:57
- Latitude: 63 N 41’
- Longitude: 148 W 58’
- Depth: 0 km
- Magnitude: ML 3.4

The location and magnitude for this earthquake may be updated as data from additional seismic stations are received. The Alaska Earthquake Information Center will continue to gather data and may issue additional releases as appropriate. With any moderate or large earthquake, aftershocks should be expected to occur.
