The Alaska Earthquake Information Center located a minor earthquake that occurred on Monday, October 13th at 11:04 PM AKDT in the east-central region of Alaska. This earthquake had a preliminary magnitude of 3.5 and was located at a depth of about 2 miles (3 km). The magnitude and location may change slightly as additional data are received and processed. No reports of this event being felt or causing damage have been received at this time.

This event was felt (III) at Anchorage and Delta Junction; (II) at Fairbanks.

Distance to nearby locations:

- 28 km (18 miles) NNE of Slana
- 58 km (36 miles) SW of Tok
- 65 km (41 miles) WSW of Tetlin
- 89 km (56 miles) E of Paxson
- 91 km (57 miles) W of Northway
- 107 km (67 miles) NE of Gakona
- 115 km (72 miles) ESE of Pump Station #10
- 130 km (81 miles) NE of Pump Station #11

Preliminary earthquake parameters:

- Origin Time (UT): 10/14/2003 07:04:34
- Latitude: 62 N 56’
- Longitude: 143 W 44’
- Depth: 3 km
- Magnitude: ML 3.5

The location and magnitude for this earthquake may be updated as data from additional seismic stations are received. The Alaska Earthquake Information Center will continue to gather data and may issue additional releases as appropriate. With any moderate or large earthquake, aftershocks should be expected to occur.
